

1 picture that would be transmitted across the
2 internet at a given speed, I identified that
3 which he had discovered by an ad hoc process; I
4 discovered the structural basis for that
5 optimization.

6 Q. Okay. So that was something that
7 was outside the scope of what he had already,
8 what Eliot had already discovered?

9 A. It really established why it worked.

10 Q. And is your name on any patent or
11 patent application with regard to that particular
12 technology?

13 A. It possibly is. I don't recall how
14 many of those my name is on since I didn't keep
15 any of those records.

16 Q. How about camera zoom applications?

17 A. Okay. How about camera zoom
18 applications?

19 Q. Is there any patent or patent
20 application dealing with camera zoom
21 applications?

22 A. Not specifically. It was, it was
23 determined that there is a correlation between
24 the zoom and pan that had been developed and what
25 is being used in cameras.
