Statements and Limiting Conditions

Purpose

The purpose of this report is to describe and document the quality of the jewelry listed and to estimate the **Fair Market Value**.

Intended Use

The intended use of this report is for providing an estate appraisal listing the Fair Market Value for use in the resolution of **The Estate of Simon Bernstein**.

Valuation Date: January 15, 2016

Definition of Fair Market Value

The fair market value is the price at which the property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or sell and both having reasonable knowledge of relevant facts. The fair market value of a particular item of property is not to be determined by a forced sale price. Nor is the fair market value of an item of property to be determined by the sale price of the item in a market other than that in which such item is most commonly sold to the public, taking into account location of the item wherever appropriate. Taken from Treasury Regulation 20.2031-1 (b)

Approach to Value

There are three traditional approaches to value that are as follows:

Income approach: Applies to income producing properties and is used only if an income situation or rental property can be identified.

Market Data approach: Compares the qualities of the subject item to an article with similar or identical qualities, and researches and records current verifiable sales of such merchandise.

Cost approach: Establishes the total value of an item by considering the value of its component parts (precious metal content, gemstone weights and qualities, labor, and any other fees) together with the appropriate retail markup according to the norms of the jewelers in the locale, supply and demand, and the current state of the marketplace.

Fair Market Value is estimated using the market data approach. Neither the income approach nor the cost approach applies in establishing Fair Market Value. However, the cost approach to value was used to check on the market values found.

Market

To value an item a market (and market level) must be recognized. The most appropriate market for jewelry can vary depending upon the article's age, condition, quality, intrinsic content, aesthetic appeal, provenance, current fashion trends, artistic interpretation, and period of manufacture among others.

The type of retail outlet that most commonly carries the items being appraised is considered to be the most appropriate market. However, the auction market was also considered as another appropriate market in establishing Fair Market Value for this type of jewelry.

Limiting Conditions

The jewelry described within has been analyzed and graded in accordance with prescribed grading standards using "state of the art" methods and precision laboratory equipment.

Jewelry constructed solely of, or in combination with, precious metals (i.e. platinum, palladium, yellow or white gold and/or silver) is tested, analyzed and described for its type and content of such metal. Unless otherwise stated, all gemstone weights, grades and measurements are approximate and stones have not been removed from their mountings.

Diamonds are graded with the prescribed grading nomenclature of the Gemological Institute of America (GIA).

Colored stones are color graded with the use of the GIA Gem Set color grading system. Unless otherwise stated, all colored stones listed on this appraisal report have probably been subjected to various treatments to improve their appearance. Treatments are considered usual and customary practices when properly disclosed and when done without intent to defraud the consumer. The treatments are mostly stable and do not require special care. When a treatment is detected and considered unusual it will be so noted by this appraiser. Some treatments are reversible and re-treatable. It may be beyond the scope of an appraisal to determine exact treatment methods or the amount of treatment present. Some treatments require sophisticated equipment not found in a standard gemological laboratory. Prevailing market values are based on these universally practiced and accepted processes by the gems and jewelry trade.

Stones which are not described in detail have no significant value.

Sources are assumed to be reliable and the appraiser does not assume responsibility for their information.

The appraiser assumes the ownership of the subject property is true as stated by the client.

The fees paid for this appraisal do not include the services of the appraiser for any other matter. In particular, fees paid to date do not include any of the appraiser's time or services in connection with any statement, testimony or other matters before an insurance company, its agents, employees or any court or other body in connection with the property herein described.

If the appraiser is required to testify or to make any statements to a third party concerning the described property and/or appraisal, the applicant shall pay the appraiser for all of such time and services so rendered.

This document is limited to its stated intended use and is invalid if all items listed in the Table of Contents are not present.

Unless expressly stated, the items appraised are in good condition. Any serious deficiencies and repairs are noted. Ordinary wear and tear is not noted.

The information in this report is confidential.

This appraisal process does not discover liens, encumbrances, or fractional interests but, if known, they are noted.

The limited owner of this appraisal is the party for whom the work was performed.

Possession of this report does not provide title to the items appraised.

Possession of this report, any portion of this report, or any copy thereof, does not include the right of publication without the appraiser's written consent.

Each item described in this report has been photographed and file copies of the photograph(s) as well as a copy of the report are maintained in the appraiser's files for at least five years after the report date.

Third parties may rely on the information in this report for the defined purpose and intended use only. Third parties requiring further information than what is in the report must obtain the written permission of the owner of the appraisal before the appraiser will discuss the report.

No changes may be made to this report by anyone other than the appraiser. The appraiser cannot be responsible for unauthorized alterations.

The professional relationship between the appraiser and the client ends with the delivery of this report or at the conclusion of the settlement.
