Re: Estate of Simon L. Bernstein, Deceased  
7020 Lions Head Lane, Boca Raton, Fl 33496  
DOD: 09/13/2012

Dear Ms. Foglietta:

As you requested, this appraisal of the personal property belonging to the estate of Simon L. Bernstein , deceased, has been prepared for estate settlement purposes.

This transmittal letter contains the assignment-specific elements of information that are required to be included in this report by the *Uniform Standards of Professional Practice (USPAP)* as promulgated by The Appraisal Foundation of Washington, DC. This report also satisfies the IRS requirements for what constitutes a "qualified appraisal."

The required item-specific information including the identity and value-relevant characteristics of the subject property along with my opinions of value and any required disclosure of the market data on which my opinions of value were based are contained in the Valuation Section of this report along with thumbnail images of the subject property.

### **Executive Summary**

On March 27<sup>th</sup> and 30<sup>th</sup> I conducted an appraisal inspection in the presence of Cynthia J. Thomas of personal property belonging to the estate of Simon L. Bernstein located at 7020 Lions Head Lane, Boca Raton, Fl 33496 . The inspection was conducted in order to identify the subject property and its value-relevant characteristics so that I could properly develop an opinion of its fair market value for estate settlement purposes. In summary, the fair market value of the subject property as of the date of death was **\$43,623.00.**

### **Intended Use of the Appraisal**

The intended use of this appraisal assignment report is to determine the Fair Market Values of the listed items for the express function of determining Federal estate tax liability. Any other use renders this appraisal null and void.

## Report Option Used

This appraisal report has been prepared making use of USPAP's Self-Contained appraisal report option.

## Identity of Client and Other Intended Users

This report is intended for use only by you, my client, your agent and by the Federal entities involved in the estate settlement process.

With the exception of you and the appraiser-identified intended users listed herein, this appraisal report is not intended to be used by or influence any particular person(s) or class(es) of persons which might take some action in reliance upon it. Unless otherwise stated, I am not aware that you or your agent intend to transmit any information contained in this report to any other person(s) or group(s) other than to the appraiser-identified intended users listed herein. My liability is limited to you and to the identified intended users of this report to the exclusion of all others. Parties other than those specifically listed as authorized intended users of this report who take some action in reliance upon this report do so at their own risk.

## Ownership Interest Being Appraised

The appraised values are based upon 100% of the estate's interest in the property undiminished by any liens, fractional interests or any other form of encumbrance. I understand that the estate is the sole owner of the property listed in this report; however, mere possession of this appraisal report is not an indication or certificate of title or ownership. Ownership and ownership interest have been represented to me by you, my client, and no inquiry or investigation has been made nor is any opinion to be given as to the accuracy of such representation.

## Type and Definition of Value Used

In this appraisal assignment I developed an opinion of Fair Market Value.

Fair Market Value is defined in Estate Tax Regulation §20.2031-1(b) which states "The fair market value is the price at which the property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or to sell and both having reasonable knowledge of relevant facts. The fair market value of a particular item of property includible in the decedent's gross estate is not to be determined by a forced sale price. Nor is the fair market value of an item of property to be determined by the sale price of the item in a market other than that in which such item is most commonly sold to the public, taking into account the location of the item wherever appropriate."

## Relevant Dates

Relevant dates associated with this assignment include the following:

- **Date of Inspection:** The subject property was inspected on **March 27<sup>th</sup> and 30<sup>th</sup> 2015**.
- **Effective Date of Appraisal:** Value opinions are effective as of the death which you stated was **September 13, 2012**.
- **Date of Report:** This report was prepared and signed this date, **April 21, 2015**

## Most Appropriate Market to Research

This assignment requires the use of fair market value, the definition of which mandates the use of the market in which comparable items are most commonly sold at retail to the public, i.e., to the end user. In my opinion, for this assignment the most appropriate markets in which to conduct market data research are [for example: yard sales, flea markets, local estate

auctions, and Internet website specializing in the sale of used household goods. or: local, national and international auction houses.] Because quality, condition, and desirability affect the appropriate market where items would most commonly be purchased by the public, I may have considered different markets for different items of personal property depending on the above factors.

### Scope of Work

Scope of work is defined by USPAP as the work actually performed in order to develop credible assignment results. The scope of work employed in this assignment, including the report content and the detail of that content, was dependent upon the needs of the client, the intended use of the report, the definition of value that I used, the effective date of the report, and the subject property's value relevant characteristics.

The scope of work for this assignment included:

- A personal inspection of the subject property was conducted in order to properly determine its identity and value-relevant property characteristics.
- While on site, I documented the relevant information in writing and took detailed high resolution digital images of the property.
- Identification research was later conducted, if necessary, making use of relevant books authored by subject property experts, or relevant periodicals and Internet websites.]
- Value research for past sales of comparable properties was conducted making use as necessary of relevant resource books, value guides, national auction houses, and specialized Internet websites, as well as personal observations made at secondary market retail establishments, local auction and estate sales.]
- For appraised items found to be common, depreciable property of minimal value for which extensive research is neither necessary, cost-effective, nor required by the client, limited research was conducted. Rather, my personal experience, knowledge and past personal undocumented observations were used as a basis for my value opinions.
- Low-value, depreciable items such as everyday pots and pans or common hand tools may have been grouped together and minimally described or researched.
- In general, the condition of the items examined was good. Any alterations from original condition or damage beyond that usual and common for items of similar age are so noted in the appraisal report. I did not test any mechanical, electrical or electronic item of property. I made the extraordinary assumption that all such devices were in good working order.
- I analyzed the market data, making adjustments as necessary for differences in value characteristics between the comparable and subject property, and arrived at my final opinion of value.
- No one provided me with significant assistance (either appraisal or otherwise) in the development of my opinions, analyses or conclusions.
- Where this appraisal is based not only on the items, but also on factual data or documentation supplied therewith, this appraisal report shall so state by making reference thereto and, where appropriate, attaching copies thereto.

### Approach to Value

In this assignment, the sales comparison approach to value was employed to determine fair market value. In the sales comparison approach, the most appropriate market is researched to locate comparable items which have sold in the past on which an opinion of value can be based. Adjustments in value are made to reflect differences (if any) in value relevant characteristics between the comparable properties and the subject properties.

Neither the cost approach to value nor the income approach to value was employed:

- In the cost approach to value, the basis for value is formed by the cost to reproduce or purchase a new suitable replacement property (adjusted downwards to reflect all forms of depreciation in the subject property, if any). Since the use of the cost approach would result in “depreciated cost new” and not in “fair market value,” the cost approach to value was not applicable to this assignment, so it was not considered.
- In the income approach, anticipated future income of investment property (i.e., income-generating property) is capitalized in order to calculate its present worth. Since the subject property is not investment property, the income approach to value was not applicable to this assignment, so it was not considered.

### **Assignment Conditions Encountered**

- **Limiting Conditions:** There was a time restriction put on me not enabling me to take as detailed photographs of some items that had been in boxes as I normally do. I also used descriptions that had been used by a previous appraiser on an earlier document in order to meet the time restrictions. Where I felt the description needed to be amended I did so.
- **Extraordinary Assumptions:** none
- **Hypothetical Conditions:** none
- **Jurisdictional Exceptions:** none
- **Other:** I was provided with an appraisal that had been done by two other appraisers in the area in 2013. As stated above I used those descriptions as often as possible. All valuations were my own. Many of my valuations were the same as the previous appraisers, simply because many items in the home were nice items, though just “furniture and decorative pieces”.

### **Listings/Offers/Past Sales**

There are no known current agreements of sale, validated offers or third-offers to sell, options, or listings of the subject property as of the effective date of the appraisal. There are no known prior sales of the subject property that have occurred within a reasonable time preceding the effective date of this appraisal.

### **Disclosure of Interest/Past Services Rendered**

I have no current or prospective interest in the subject properties or parties involved. Neither have I performed any services (appraisal or otherwise) related to the subject property within the preceding three years.

### **Disclaimers and Terms and Conditions**

Unless otherwise noted in the Valuation Section of this report, this appraisal is based only on the readily apparent identity of the items appraised. In my opinion, no further opinion or guarantee of authenticity, genuineness, attribution or authorship is necessary.

With the exception of you, my client, possession of this report or its copy does not carry with it the right of publication, nor may this report be used for any purpose by anyone other than you or your agent without my previous written consent. If this report is reproduced, copied or otherwise used by those authorized, the report must be used in its entirety which includes this transmittal letter and all enclosures and attachments. Furthermore, no changes can be made to this report by anyone other than myself. I am not responsible for any unauthorized changes to this report, and any such unauthorized changes immediately render this report null and void.

## Statements and Limiting Conditions

### **Purpose**

The purpose of this report is to describe and document the quality of the jewelry listed and to estimate the **Fair Market Value**.

### **Intended Use**

The intended use of this report is for providing an estate appraisal listing the Fair Market Value for use in the resolution of **The Estate of Simon Bernstein**.

**Valuation Date:** January 15, 2016

### **Definition of Fair Market Value**

The fair market value is the price at which the property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or sell and both having reasonable knowledge of relevant facts. The fair market value of a particular item of property is not to be determined by a forced sale price. Nor is the fair market value of an item of property to be determined by the sale price of the item in a market other than that in which such item is most commonly sold to the public, taking into account location of the item wherever appropriate. Taken from Treasury Regulation 20.2031-1 (b)

### **Approach to Value**

There are three traditional approaches to value that are as follows:

**Income approach:** Applies to income producing properties and is used only if an income situation or rental property can be identified.

**Market Data approach:** Compares the qualities of the subject item to an article with similar or identical qualities, and researches and records current verifiable sales of such merchandise.

**Cost approach:** Establishes the total value of an item by considering the value of its component parts (precious metal content, gemstone weights and qualities, labor, and any other fees) together with the appropriate retail markup according to the norms of the jewelers in the locale, supply and demand, and the current state of the marketplace.

***Fair Market Value is estimated using the market data approach. Neither the income approach nor the cost approach applies in establishing Fair Market Value. However, the cost approach to value was used to check on the market values found.***

### **Market**

To value an item a market (and market level) must be recognized. The most appropriate market for jewelry can vary depending upon the article's age, condition, quality, intrinsic content, aesthetic appeal, provenance, current fashion trends, artistic interpretation, and period of manufacture among others.

The type of retail outlet that most commonly carries the items being appraised is considered to be the most appropriate market. However, the auction market was also considered as another appropriate market in establishing Fair Market Value for this type of jewelry.

### **Limiting Conditions**

The jewelry described within has been analyzed and graded in accordance with prescribed grading standards using "state of the art" methods and precision laboratory equipment.

Jewelry constructed solely of, or in combination with, precious metals (i.e. platinum, palladium, yellow or white gold and/or silver) is tested, analyzed and described for its type and content of such metal. Unless otherwise stated, all gemstone weights, grades and measurements are approximate and stones have not been removed from their mountings.

Diamonds are graded with the prescribed grading nomenclature of the Gemological Institute of America (GIA).

Colored stones are color graded with the use of the GIA Gem Set color grading system. Unless otherwise stated, all colored stones listed on this appraisal report have probably been subjected to various treatments to improve their appearance. Treatments are considered usual and customary practices when properly disclosed and when done without intent to defraud the consumer. The treatments are mostly stable and do not require special care. When a treatment is detected and considered unusual it will be so noted by this appraiser. Some treatments are reversible and re-treatable. It may be beyond the scope of an appraisal to determine exact treatment methods or the amount of treatment present. Some treatments require sophisticated equipment not found in a standard gemological laboratory. Prevailing market values are based on these universally practiced and accepted processes by the gems and jewelry trade.

**Stones which are not described in detail have no significant value.**

Sources are assumed to be reliable and the appraiser does not assume responsibility for their information.

The appraiser assumes the ownership of the subject property is true as stated by the client.

The fees paid for this appraisal do not include the services of the appraiser for any other matter. In particular, fees paid to date do not include any of the appraiser's time or services in connection with any statement, testimony or other matters before an insurance company, its agents, employees or any court or other body in connection with the property herein described.

If the appraiser is required to testify or to make any statements to a third party concerning the described property and/or appraisal, the applicant shall pay the appraiser for all of such time and services so rendered.

This document is limited to its stated intended use and is invalid if all items listed in the Table of Contents are not present.

Unless expressly stated, the items appraised are in good condition. Any serious deficiencies and repairs are noted. Ordinary wear and tear is not noted.

The information in this report is confidential.

This appraisal process does not discover liens, encumbrances, or fractional interests but, if known, they are noted.

The limited owner of this appraisal is the party for whom the work was performed.

Possession of this report does not provide title to the items appraised.

Possession of this report, any portion of this report, or any copy thereof, does not include the right of publication without the appraiser's written consent.

Each item described in this report has been photographed and file copies of the photograph(s) as well as a copy of the report are maintained in the appraiser's files for at least five years after the report date.

Third parties may rely on the information in this report for the defined purpose and intended use only. Third parties requiring further information than what is in the report must obtain the written permission of the owner of the appraisal before the appraiser will discuss the report.

No changes may be made to this report by anyone other than the appraiser. The appraiser cannot be responsible for unauthorized alterations.

The professional relationship between the appraiser and the client ends with the delivery of this report or at the conclusion of the settlement.
